

THE NATIVE MIND:
COGNITION AND CULTURAL MANAGEMENT OF NATURE

BY
SCOTT ATRAN¹ AND DOUGLAS MEDIN²

TABLE OF CONTENTS

Chapter 1. Introduction

1.1 Overview.

1.2 Why focus on biological cognition?

**1.3 The Case for Interdisciplinary Approaches: Why Anthropology and Psychology
Need Each Other**

1.4 Theoretical Issues in the Cognitive Science of Folkbiology

1.5 Themes

1.6 Book Summary

Chapter 2. Universals and Devolution: General Claims

2.1 Evolved Universals in Cognition and Culture

2.2 Universal Aspects of Folkbiology

2.3 Historical Developments

2.4 Itza' Maya Folktaxonomy

2.5 Loss of Knowledge and Familiarity with Nature

2.6 Conclusions

¹ Director of Research, Anthropology, Centre National de la Recherche Scientifique, Paris, France; Visiting Professor, Psychology and Public Policy, University of Michigan, Ann Arbor, MI; Presidential Scholar, Sociology, John Jay School of Criminal Justice, New York, NY.

² Professor, Psychology, Northwestern University, Evanston, IL.

Chapter 3. Study Populations, Methods and Models

3.1 Mesoamerican populations

3.2 North American Populations

3.3 Logic of Cross-Cultural Comparison

3.4 Triangulation as a research strategy

3.5 The Cultural Consensus Model

3.6 Summary

Chapter 4. Devolution and Relative Expertise

4.1 Evolutionary Context

4.2 Biology as a module of mind

4.3 Folk Taxonomies and associated reasoning processes

4.4 Ideals and Typicality

4.5 The Essence of the Basic Level

4.6 Implications for Categorization and Reasoning

4.7 Biology as a module of mind

4.8 Conclusions

Chapter 5. Development of Folkbiological Cognition

5.1 Background. Relation of Folkbiology to Folk Psychology

5.2 Role of culture and experience in induction

5.3 Childhood Conceptions of Species Essences

5.4 Summary

6. Culture as a Notional, not Natural, Kind

6.1 Culture as Norms and Rules

6.2 Cultural Psychology

6.3 Context and Situated Cognition

6.4 Culture as a Superorganism

6.5 The Grammar of Culture

6.6 I-Culture

6.7 Generativist (Agent-Based) Models of Culture

6.8 Cultural Epidemiology

6.9 Summary

Chapter 7. Folkecology and the Spirit of the Commons: Garden Experiments in

Mesoamerica

7.1 Background

7.2 Historical Geography

7.3 Folkecology and “The Tragedy of the Commons”

7.4 Ground-Truthing: Biodiversity, Forest Cover and Soil Conditions

7.5 Mental Models of Folkecology

7.6 Further Ground-Truthing

Chapter 8: Cultural Epidemiology

8.1 Social and expert networks

8.2 Information transmission

8.3 The Learning Landscape

8.4 Methodologies for Modeling Culture

8.5 A New Approach to the Study of Culture and Cognition

Chapter 9: Mental Models and Inter-group Conflict

9.1 A Brief History of the Menominee

9.2 The Menominee Forest

9.3 Majority Culture -- Shawano County

9.4 Inter-community relations

9.5 Mental Models

9.6 Knowledge Organization

9.7 Values and Practices

9.8 Intra- and inter-group perception

9.9 Sources of misperception

9.10 Real versus Perceived Cultural Differences

9.11 Cultural support

9.12 Conclusions

Chapter 10: Conclusions and Projections

10.1 A Few Clarifications

10.2 Theoretical implications of our findings

10.3 Methodological Implications

10.4 Applications and Policy implications

10.5 Border Crossings

NOTES
